Wildflower mixes create attractive clusters of changing colors throughout the growing season, while also providing essential food and nesting habitat for beneficial insects and pollinators. Our **Rocky Mountain Wildflower Mix** offers a variety of colors that will bloom throughout the growing season. This mix will make a great addition to any area of your landscape that you want to enhance the color with wildflowers that are not commonly found in typical store-bought seed mixes. This wildflower mix contains no grasses and no fillers. We pride ourselves on our professional-grade wildflower seeds.
