20% Perennial Ryegrass  
20% Creeping Red Fescue

**Seeding Rate:**

5 lbs. / 1,000ft<sup>2</sup> (new lawn)  
3 lbs. / 1,000ft<sup>2</sup> (overseeding)

**Hardy Lawn Turf Mix** is the most versatile mix because it can grow in nearly all conditions. It has a rich green color and a soft, comfortable feel that holds up well under traffic. It's perfect for use around houses, parks, and sports fields that experience full sun to heavy shade. This mix is very similar in quality to our Blue Ribbon Mix, but it tolerates heavy shade better with the addition of creeping red fescue. With this grass seed, your lawn will thrive under shad trees, on the north side of building, and almost every area, regardless of how much sun it gets. Our Hardy Lawn Turf Mix is very similar to the "sun and shade" mix you'd find in a hardware store, but we never add fillers like annual ryegrass.

*Pro Tip: Keep the soil damp, but not soggy, for the first 30 days after planting. Consider setting your irrigation system to water for periods of 3 to 5 minutes, several times per day until your new lawn is at least 4 inches tall. After the second mowing you can start cutting back the watering cycles to 15 minutes 2-3 times per week as needed.*
