20% Perennial Ryegrass

#### **Seeding Rate:**

5 lbs. / 1,000ft<sup>2</sup> (new lawn)  
3 lbs. / 1,000ft<sup>2</sup> (overseeding)

**Blue Ribbon Turf Mix** is the clear choice when only the best will do. Only top-rated varieties make it into this mix, creating a genetically superior cool-season turf with a fine-bladed texture, deep green color, and excellent traffic tolerance. Ideal for parks, sports fields, residential lawns with active families and pets. Kentucky bluegrass is an excellent choice when you want greener grass and a lush lawn. But once mixed with the perennial ryegrass, you get the benefits of both: the color and texture of bluegrass and the fast growth and cold tolerance of ryegrass. Our Blue Ribbon Turf Mix is TWCA qualified and uses up to 40% less water than conventional turfgrasses, so your lawn will look great without using all that water.

*Pro Tip: Keep the soil damp, but not soggy, for the first 30 days after planting. Consider setting your irrigation system to water for periods of 3 to 5 minutes, several times per day until your new lawn is at least 4 inches tall. After the second mowing you can start cutting back the watering cycles to 15 minutes 2-3 times per week as needed.*
