30% Kentucky Bluegrass

**Seeding Rate:**

8-10 lbs. / 1,000ft<sup>2</sup> (new lawn)  
5 lbs. / 1,000ft<sup>2</sup> (overseeding)

The **Turf Trade Mix** was developed by the Turfgrass Water Conservation Alliance (TWCA) and Salt Lake City with a focus on water-wise practices and “preserve the functional beauty and natural brilliance of living turfgrass.” This blend combines the strength and hardiness of Tall Fescue with a touch of elegance and lushness of Kentucky Bluegrass. This powerful duo creates a lawn that can withstand heavy use and foot traffic, making it an ideal choice for families, pets, and outdoor gatherings. You can have peace of mind knowing you're investing in a superior grass seed mix that will deliver a beautiful, water-wise, and enduring lawn. Transform your outdoor space and enjoy a stunning green oasis for years to come. The TWCA certification guarantees that this mix adheres to the highest water conservation standards ([www.tgwca.org](http://www.tgwca.org)).

*Pro Tip: Keep the soil damp, but not soggy, for the first 30 days after planting. Consider setting your irrigation system to water for periods of 3 to 5 minutes, several times per day until your new lawn is at least 4 inches tall. After the second mowing you can start cutting back the watering cycles to 15 minutes 2-3 times per week as needed.*
