and erosion control

Specifications:

100% Tall Fescue

Seeding Rate:

8-10 lbs. / 1,000ft² (new lawn)

5 lbs. / 1,000ft² (overseeding)

Triple-Play Turf Mix is legendary for tolerance of heat, sun, shade, traffic, poor soil condition, and amazing disease resistance. When it comes to cool-season lawns, it's hard to beat the adaptability and overall toughness of our elite turf-type tall fescue blend. Our **Triple-Play Turf Mix** is a blend of three types of low-growing, dark green turf-type tall fescue grass varieties that are TWCA qualified to use 40% less water than other types. The result of this combination is a lawn that is more drought tolerant and able to withstand high summer temperatures than both Kentucky bluegrass and perennial ryegrass. If you're looking for a lawn that will accommodate heavy traffic from active kids and dogs, or needs to wait a while between watering, then **Triple-Play** is for you.

Pro Tip: Keep the soil damp, but not soggy, for the first 30 days after planting. Consider setting your irrigation system to water for periods of 3 to 5 minutes, several times per day until your new lawn is at least 4 inches tall. After the second mowing you can start cutting back the watering cycles to 15 minutes 2-3 times per week as needed.
